

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (previously presented) A method of presenting and managing a history of web pages accessed, comprising:
 - accessing a web page by a user;
 - reducing the size of the accessed web page to a thumbnail snapshot; and
 - displaying the thumbnail snapshot to the user in an area of a screen containing only history information.
2. (previously presented) The method recited in claim 1, wherein prior to the reducing the size of the accessed web page to a thumbnail snapshot, further comprising:
 - checking a history file to determine if the accessed web page is in the history file; and
 - reducing the size of the web page only when the accessed web page is not in the history file.
3. (original) The method recited in claim 2, wherein the thumbnail snapshot is displayed to the user in a toolbar.

4. (original) The method recited in claim 3, wherein the toolbar is able to scroll and display a plurality of thumbnail snapshots from the most recent to the least recent.

5. (original) The method recited in claim 4, further comprising:
selecting a web page to revisit by clicking on a thumbnail snapshot of the web page stored as a result of prior access to the web page.

6. (currently amended) A computer program embodied on a computer readable medium and executable by a computer for presenting and managing a history of web pages accessed, ~~comprising when executed performing the steps of:~~
accessing a web page by a user;
reducing the size of the accessed web page to a thumbnail snapshot; and
displaying the thumbnail snapshot to the user in an area of a screen containing only history information.

7. (previously presented) The computer program recited in claim 6, wherein prior to the reducing the size of the accessed web page to a thumbnail snapshot, further comprising:

checking a history file to determine if the accessed web page is in the history file; and
reducing the size of the accessed web page only when the web page is not in the history file.

8. (original) The computer program recited in claim 7, wherein the thumbnail snapshot is displayed to the user in a toolbar.

9. (original) The computer program recited in claim 8, wherein the toolbar is able to scroll and display a plurality of thumbnail snapshots from the most recent to the least recent.

10. (original) The computer program recited in claim 9, further comprising:
selecting a web page to revisit by clicking on a thumbnail snapshot of the web page stored as a result of prior access to the web page.

11. (previously presented) The method of claim 1, wherein the area of a screen containing only history information displays a plurality of thumbnail snapshots of previously accessed web pages simultaneously.

12. (new) The method recited in claim 1, wherein the screen is embodied in a cellular phone, a palm computer or a personal digital assistant.

13. (new) The method recited in claim 1, wherein the screen is embodied in a cellular phone.

14. (new) The computer program recited in claim 6, wherein the screen is embodied in a cellular phone, a palm computer or a personal digital assistant.

15. (new) The computer program recited in claim 6, wherein the screen is embodied in a cellular phone.

16. (new) A terminal, comprising:
a processor;
a screen; and
a computer program embodied on a computer readable medium and executable by the processor for presenting and managing a history of web pages accessed, when executed performing the steps of:
accessing a web page by a user;
reducing the size of the accessed web page to a thumbnail snapshot;
and
displaying the thumbnail snapshot to the user in an area of the screen containing only history information.

17. (new) The terminal recited in claim 16, wherein, when executed, the computer program, prior to the reducing the size of the accessed web page to a thumbnail snapshot, further performs the steps of:
checking a history file to determine if the accessed web page is in the history file; and
reducing the size of the accessed web page only when the web page is not in the history file.

18. (new) The terminal recited in claim 16, wherein the thumbnail snapshot is displayed to the user in a toolbar.

19. (new) The terminal recited in claim 18, wherein the toolbar is able to scroll and display a plurality of thumbnail snapshots from the most recent to the least recent.

20. (new) The terminal recited in claim 19, wherein, when executed, the computer program further performs the step of:

selecting a web page to revisit by clicking on a thumbnail snapshot of the web page stored as a result of prior access to the web page.

21. (new) The terminal recited in claim 16, wherein the area of a screen containing only history information displays a plurality of thumbnail snapshots of previously accessed web pages simultaneously.

22. (new) The terminal recited in claim 16, wherein the terminal is a cellular phone, a palm computer or a personal digital assistant.

23. (new) The terminal recited in claim 16, wherein the terminal is a cellular phone.
